

AR 75

Loosening, separating, transporting: 1,500 - 3,000 1/min.

The specialist for sifting technology: AR 75

Primarily external vibrators with slow speeds are utilized in sifting technology. The AR 75 for example. Its sustained performance ensures that the materials are moving constantly and are sifted continuously and thoroughly.

- Long staying power thanks to its powerful electric motor with stable speeds.
- Excellent power-to-weight ratio.
- Finely adjustable centrifugal forces via adjustable eccentric weight discs.
- Vibration resistant design
- Fastened with a flange
